PROGRAM OVERVIEW

This is a free 45 hour energy efficiency technical training for industry professionals seeking to advance their skillsets as training providers, educators and instructors. This course has been specifically designed to provide selected candidates with our step by step process, curriculum, instructional andragogy, and hands on experience. Graduates of this course will be connected to paid/contract teaching opportunities.

The program is delivered virtually, and focuses on energy efficiency, outreach, education and implementation assistance initiatives for small commercial properties. This program is open to trainers, regardless of background.

Train the Trainer Candidate Requirements:

- 3 years of clean energy industry experience
- 1 year of teaching clean energy concepts experience
- Completed the CEA Building Envelope Class

All applicants will undergo interviews, evaluations, and a screening/selection process. Applicants are encouraged to apply early. Space is limited and not guaranteed.
