WE ACT's Green Institute is offering a free course to become trained in Building and HVAC Fundamentals as well as training for career advancement and job placement. Becoming trained in building and HVAC fundamentals gives you the necessary safety and skills training to land new jobs in the energy efficiency industry and become a part of the growing green revolution. All participants will be offered the Building Science Principles and EPA 608 Certifications.

This program is open to everyone aged 18+ with a high school diploma or equivalency, regardless of background. All participants must apply following the link above and complete an interview process to prepare for the all day course. The link to the information session will be sent to you once you apply! Go to [tinyurl.com/weactapp](https://tinyurl.com/weactapp) or scan the QR code at the top to apply!
